 - a. If you are renting a cabin, **not all docks are usable for boats**. Know your dock and your lake! Rent a slip, moor in a cove, choose a different lake. You have options.
 - b. Ask cabin owners before renting questions regarding: mooring access or dock length & height from water line, has there been previous damage at dock/lake or waves that frequently rock boat, underwater hazards near dock or enroute to launch location(rocks, low waterline), where is launch location (private launches must have 60' of clear access for our trucks and boat length), lake hazard locations and if they're well marked. Enlist neighbors to help you, local marina, water tow, other boaters as needed.
 - Dock: Always position front of boat towards incoming waves and keep un-abrasive docking conditions. Mooring: boat should rotate with front into waves, always attach to front of hull metal clip called the bow eye. Keep water out of boat hulls, battery and motor, electronics. Boat should be positioned to float AWAY from dock, not into dock nor under dock, change boat docking accordingly with the current and check consistently that damage is not occurring. Fenders to be used every time and secured in place prior to dock approach. Drivers, do not ram docks or slide into docks. This causes instant damage. Boat should only be in contact with water at all times. Use hullhuggers on docks to protect vessels.
 - ALL MECHANICAL ISSUES MUST BE IMMEDIATELY REPORTED TO US UPON DISCOVERY. YOU CANNOT ATTEMPT REPAIRS TO VESSELS WITHOUT MBR AUTHORIZATION.
 - DEPTH GAUGES & TROLLING MOTORS ARE A COURTESY AND BOATS WILL NOT BE SERVICED MID-RENTAL FOR THOSE ITEMS.
